ABOUT JETVOY

The conception of Jetvoy marks the marriage of two traditionally separate industries; aviation and cryptocurrency. Jetvoy is the brainchild of a successful entrepreneur and aviation industry insider. The company seeks to capitalize upon the largely untouched markets of aviation and hospitality by solving real world issues through its innovative token and associated DApps (decentralized applications).

With cryptocurrency, as a whole, being set to dominate and revolutionize traditional markets and industries in the coming decade, Jetvoy is seeking to establish itself as the leader and pioneer in traveling related cryptocurrencies and bring the revolution ever nearer! We hope you will find the following whitepaper both interesting and informative to read!

OUR MISSION

Our mission is to disrupt the contemporary aviation & travel industry by doing the following:

- Introducing crypto in the travel & aviation industry and together providing transparency through blockchain and innovation through the crypto based loyalty point system and concierge platform.
- Successfully deploying and launching our innovative token designed and backed by industry experts!
- Building a smart travel system with our booking platform and the alignment with the crypto currency. This will provide us with the ability to revolutionize and provide incentives for use of the cryptocurrency in the world.
- Creating unique and intuitive DApps which targets and solves pervasive problems in the aviation sector!

- Successfully deploying and launching our innovative token designed and backed by industry experts!
- Partnering with prominent commercial airlines, hotels, resorts, marketing experts and other popular figures to create awareness
- Jetvoy can make your next holiday all the more enjoyable and with many benefits!

- Creating unique and intuitive DApps which targets and solves pervasive problems in the aviation sector!
- Partnering with blockchain experts and business professionals to ensure we deliver on utility and continuously increasing Jetvoy value and rewarding holders.

OUR CORE VALUES

PASSION AND WORK ETHIC

It is our passion and work ethic which fundamentally forms the foundation of everything we do and constantly pushes us to create and innovate. We see ourselves as industry leaders and seek to constantly redefine what is considered impossible.

DIVERSITY AND CONNECTION

At Jetvoy we believe our diversity and global connections are some of our biggest assets. We see our project as a unique opportunity to connect with people from all over the world: forging meaningful, long-term friendships and building a truly global community! We look forward to getting to know you and hope you join us.

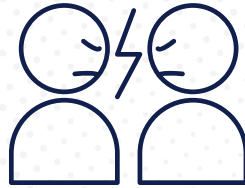

AUTHENTICITY AND TRANSPARENCY

Authenticity and transparency are values that many others underpin. Our aim is to inform every single choice while also explaining the reasoning and benefits of each business decision. We recognize these are qualities which are unfortunately rarely associated with the cryptocurrency space, Jetvoy is here to change that!

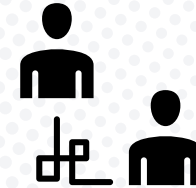

THE PROBLEMS

The current climate in aviation and travel related industries can be aptly summed up by three key issues:

DIVIDED

Despite being an industry with a focus on globalization and connecting people from all over the world, the travel industry is curiously divided and segmented. While it is true that alliances do and have existed amongst some airlines as well as between airlines and hotels, in reality they have and continue to be largely superficial and subject to many limits. There is a significant lack of a global network which truly connects the travel industry on a global scale and streamlines the process from booking your flight to checking in at your hotel or resort.

INEFFICIENT

Unfortunately, consumers interested in embarking on a stress-free holiday or their regular commute to work are subjected to a lengthy, inefficient and overcomplicated travel process. From having to scour the internet and talking to multiple travel agencies to obtain the best deals on flights or hotels, to the long lines and wait times that often greet a weary traveller upon arrival at their destination. The fact of the matter is that the contemporary system and processes travellers are subjected to are, simply put, inadequate.

RESTRICTIVE

Perhaps somewhat ironically, the contemporary travel industry, while appearing to promote and support ideals of freedom and choice, often imposes restrictions upon its customers in an attempt to coercively maintain their loyalty.

This is particularly clear when one considers the plethora of various travel and loyalty points programs that exist in the travel industry. While all of them are unique in their own right, they too often share the common feature of restricting the loyal fliers that should be rewarded. These loyalty points are often non-transferable in an attempt to coerce travelers into frequently flying with a particular airline, while they may also have significant limitations on how they can be used. Current loyalty point systems have expiration dates on their points or even have additional fees associated with using the points, which can lower the discount a person receives.

In addition to the above, luxury traveling is not easily accessible to people since they would have to book their jets from a different location and the rest of their luxury travel experience through separate platforms (i.e. private jets/yachts, luxurious stays and cars).

ENTER JETVOY

INNOVATIVE AND PROVIDING SOLUTIONS

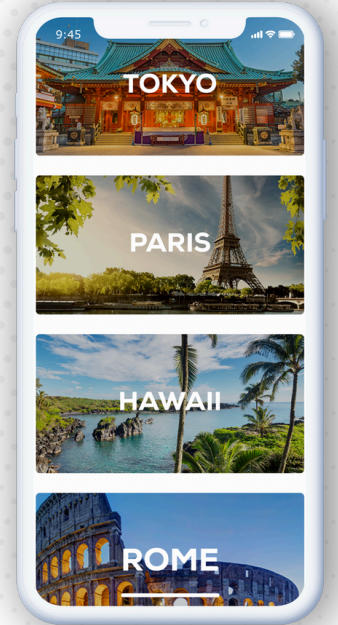

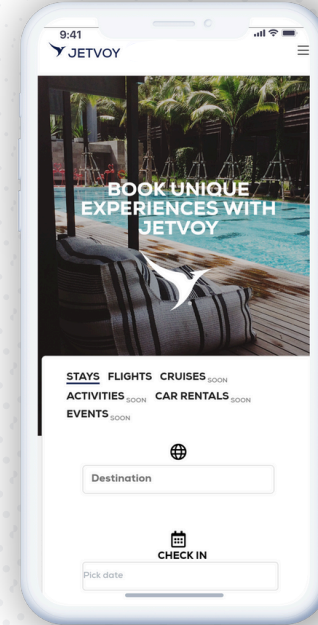

BENEFITS OF JETVOY

We recognize that achieving Jetvoy's visions and goals are not possible without the support from loyal investors like yourself and in order to achieve those we have different products, utilities and benefits to increase its value.

JETVOY PLATFORM

The main utility of the token is our very own booking platform. Similar to Booking.com and Expedia we will provide bookings for flights, hotels, resorts, cruises and cars. Our twist will be the use of cryptocurrency for the bookings and our loyalty point system which will be based on our token. This will be the main product which will open doors to the extra following benefits.

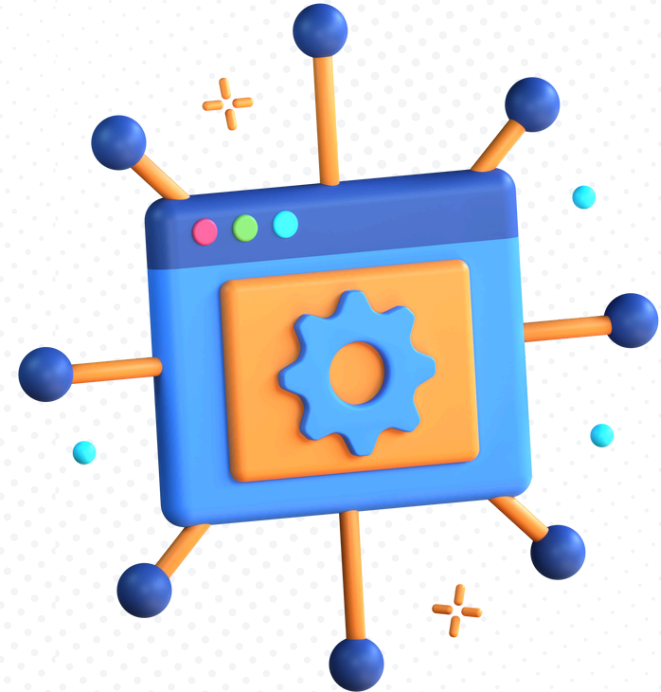

ACCESS TO LUXURY TRAVEL

Travel the Jetvoy Way! As holders of Jetvoy you will also have access to our innovative line of services! For example, this includes the ability to book private jets & yachts, luxury real estate & cars using nothing more than your Jetvoy via our very own concierge service. Think Uber but way bigger and way cooler! And this is simply the beginning... Making bookings on the fly for the hotels and resorts you know and love using Jetvoy is soon to become true reality. Our vision is to bring you unparalleled access to the travel industry and make your next holiday all the more enjoyable!

JETVOY LOYALTY POINT SYSTEM

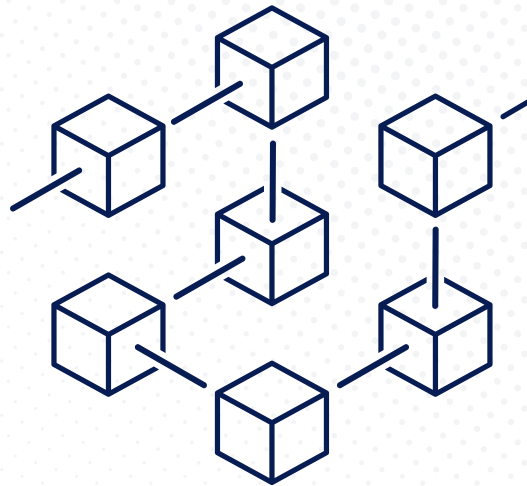

Jetvoy's DApps have been designed to offer practical solutions for real-world challenges in the aviation and travel industries. Unlike many projects, our system enables users to track and redeem travel points from various loyalty programs, which are then converted into Jetvoy tokens.

This allows users to have full control over their rewards, holding them as cryptocurrency and giving them the option to use or trade the points for their desired purpose—whether it's for discounts on future bookings or their monetary value. Jetvoy combines the benefits of blockchain technology and traditional loyalty systems to create a more flexible and rewarding travel experience.

TOKENOMICS

Jetvoy will be a multi-chain token that started with a deployment on the Ethereum L2 blockchain, Base, leveraging its low fees and scalability. With a total supply of 100 billion (100,000,000,000 JETVOY), the token is designed to provide maximum value to holders without transaction taxes, ensuring seamless and cost-effective trading.
